

CLAAS

CLAAS connect

My whole farm
on one platform.

One platform. One ID.
All my farm data.

Get more done
with Smart Farming.
digital.claas.com

My digital expert.

Machine data, connectivity functions,
farm management solutions, parts,
licences – with CLAAS connect,
I've got the whole world of CLAAS
in my pocket.

Connects
my farm.

I've got all
the data I need.

My machines create an intelligent network whose impact far exceeds the sum of their individual parts.

1. Future-proof.

My digital CLAAS solutions are continuously evolving. Increasing the profitability of my whole farm long-term.

2. Carefree.

With CLAAS connect I have a digital expert by my side – a dependable partner who supports me in my work.

3. Cost-effective and efficient.

With the help of CLAAS digital solutions, I can work more cost-effectively and efficiently. I can cut costs and save time.

My first steps.

One platform, one ID, one click –
with CLAAS connect I can access all
my farm data in real time, at any time,
from anywhere.

Connecting
farms to people.

I manage
my farm data digitally.

I just log in with my CLAAS ID.
My machines automatically appear
in the app.

I can create field boundaries and other master data for my farm quickly and easily and connect straight to my CLAAS service partner.

- Comprehensive overview of machines
- Precise management of field and master data
- Cross-organisational management
- Easy to connect to farm management software
- Full role and rights management
- Convenient connection to service

My operational reliability.

With CLAAS connect, I have a
Parts Shop¹ in my workshop.
And everything else I need to ensure
that my machines are always
ready for action.

¹offer may vary according to country.

**Keeps downtime
to a minimum.**

My machines are
always ready for action.

Less downtime, more efficiency,
rapid response.

I get an overview of all service and
maintenance data and have a direct line
to the dealer.

I can find the right operating instructions
for my machine in next to no time.

I can use the lubricant advisor to find
and order the right product and quantity
for my machine.

I can find the right parts in Parts Doc and
have them delivered from the Parts Shop¹
by my dealer.

¹offer may vary
according to country.

My machines.

Wherever I am,
I always have a complete overview of
machine performance and can see how
the job is progressing in the field –
as if I were at the wheel.

Makes my farm
more productive.

I make efficient use of my machines.

Optimal machine setting,
efficient fleet management,
full capacity utilisation.

The machine overview is displayed on the app or on desktop.

I can see when the work in the field is estimated to be completed.

Operating time analysis allows me to pinpoint downtimes and find solutions.

With CEMOS Advisor I can optimise my combine harvester settings.

My documentation.

My harvesting machine
does the documentation for me.
Machine and harvest data for each field
are merged in one entry.

Records
my success.

My documentation sorts itself.

Precise yield maps, less admin,
more certainty.

I can combine work diary entries from
different sources for a clear overview.

Documentation logs are stored
in the system independently of the driver.

My yield maps are automatically
interpolated and displayed.

My campaign is summarised clearly
and concisely in one place.

My task management.

Plan, execute, send back –
CEMIS 1200 and CLAAS connect turn
my machines into a second office.
I can send jobs to the field and back
online with just a few clicks.

Reduces
my workload.

I can transfer
my job data online.

Precise track planning, easy job creation,
considerable time saving.

With track planning I can manage tracks
and create the optimal reference track.

I can create my application maps
based on satellite images and other maps.

I can transfer master and
task data online.

Work progress is recorded for
each field and I can check it in real time.

With CEMIS 1200 I can create jobs
with just one click.

My geodata.

The Geocentre takes care of my
yield maps, leaving me to focus fully
on the work and the harvest.

Recognises
my potential.

I can manage my geodata in one place.

Clear maps, easy to create, more efficient.

I can merge different formats (telemetry data, ISOXML and shape files) to create one yield map.

I can find all geodata, maps and associated machine data clearly arranged in one place.

I can use satellite images for monitoring, field comparisons and to create potential maps.

I can superimpose my maps and data and interpret them.

My mixed fleet.

All my machines belong to one big family – even if they are not from CLAAS. The Connection Manager enables me to exchange and share all machine data.

Connects all
machine manufactures.

I can keep track
of my fleet at all times.

Transparent fleet, easy data exchange,
complete overview.

I can find all my machines in
CLAAS connect – even ones from
different manufacturers.

It's easy to connect third-party
machines via Data connect.

I can import and interpolate yield data
from different manufacturers.

I can also use CLAAS machine data
in other systems.

My configurator.¹

Lunch break at the edge of the field.
I can configure my new machine
right now in CLAAS connect.
And book a demo with my dealer
at the same time.

¹offer may vary according to country.

**Brings the dealer
to the field.**

I can find exactly
the right machine.

Customised configuration,
demo sorted, transparent offer.

I can configure my new machine to suit
my requirements in CLAAS connect.

I can ask my dealer for an offer and
book a demo right away.

I can easily activate test licences in
CLAAS connect before purchasing.

Download the app now
and get started.
